

Relaxed commute to work, mobile even in your leisure time

RMV-JobTicket

Basis

Your RMV-JobTicket – Your **advantage**

Go to work stress-free

Stress due to increasing traffic, rising fuel prices and lack of parking is now a thing of the past. RMV-JobTicket is the safe and convenient alternative for commuters and ensures a relaxed journey to work.

Mobile even in your leisure time

The RMV-JobTicket is applicable round the clock in the registered area of validity – in the evenings, on weekends and on holiday. This way, thanks to the RMV-JobTicket, you can travel comfortably even in your leisure time: e.g. when going out for sports, to visit friends or during excursions. And if you want to go a little further, all you need is a connecting ticket.

Convenient travel

The RMV-JobTicket offers you a price advantage. If you are already using public transport to go to work, you normally pay less for the RMV-JobTicket than for the regular monthly or annual ticket. Even if you have travelled by car so far, buses and trains are certainly an attractively priced alternative. Apart from the morning traffic, you also avoid paying for fuel, wastage and possible parking charges.

Good for the climate

Moreover, by using your RMV-JobTicket, you actively contribute towards climate protection.

Where and when is your RMV-JobTicket valid?

An RMV-JobTicket is a ticket that is specifically issued to travel to and from work. And it's personal for each employee, individually tailored to the respective commute, regardless of which or how many tariff zones it goes through. That is why this ticket is non-transferrable.

Your RMV-JobTicket is only valid for you – it is therefore not possible to transfer or take people with you.

Your RMV-JobTicket is applicable within the registered validity area for all RMV transport services – bus, suburban train, regional train, tram and underground train. And always in 2nd class, all day, 365 days a year, during holiday, in the evenings and on weekends. For any number of trips, in any way you like.

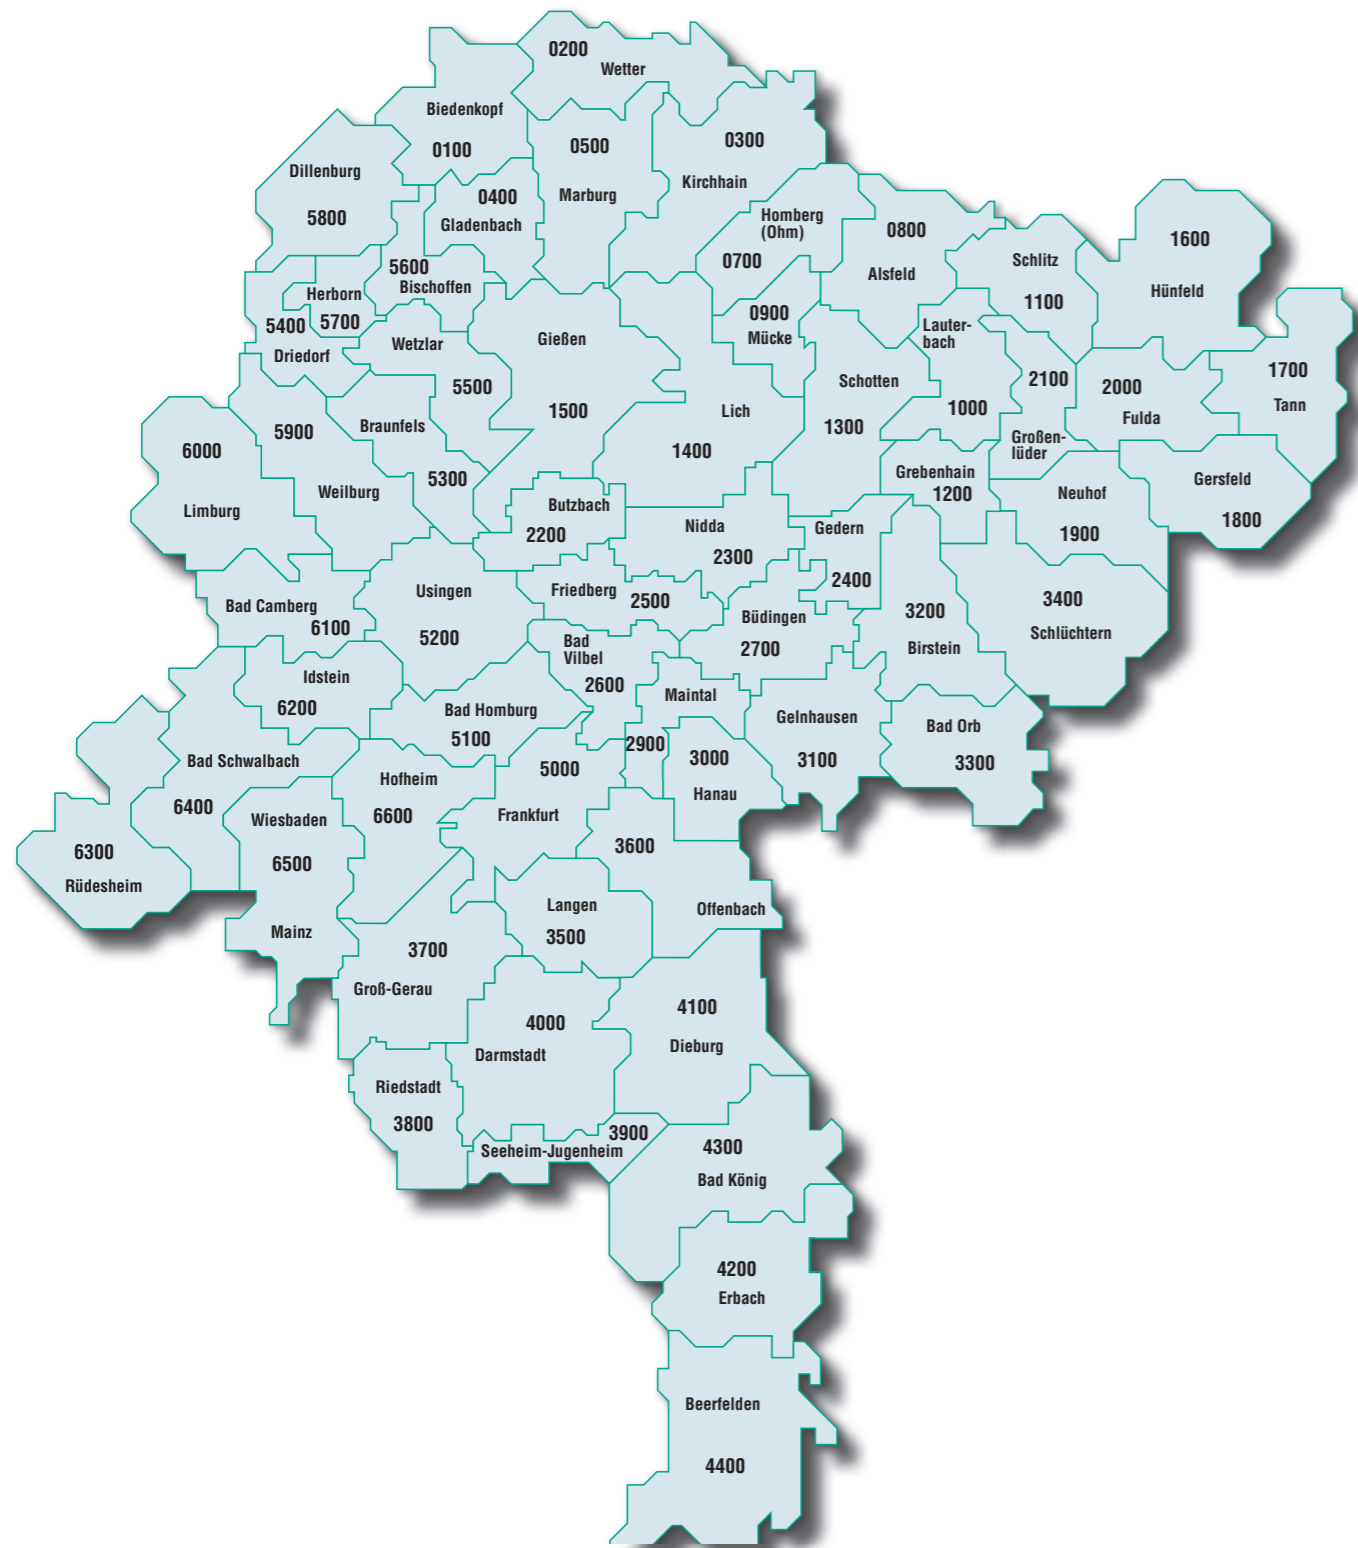

RMV-JobTickets of price level 7 apply network-wide – i.e. in the entire RMV network.

RMV – network zone

Overview of the A tariff zones

The ticket shows the classification of the RMV network zone into A tariff zones. These are relevant for the validity of the RMV-JobTickets: As soon as a commute passes through an A tariff zone, the RMV-JobTicket is valid for all RMV services in the entire A tariff zone – even in your leisure time, round the clock.

What else does your RMV-JobTicket offer?

- ✓ With an RMV-JobTicket, you can purchase supplementary tickets for using IC and EC trains. That means: The RMV-JobTicket is the base ticket and an additional so-called supplementary ticket can be purchased at a low price for using the IC or EC trains. This is mainly interesting for long-distance commuters who want to travel by faster long-distance trains.
- ✓ If you want to commute beyond the spatial validity area of your RMV-JobTicket, you can buy a connecting ticket directly at RMV ticket machines. It is essential that either the start or the destination of your tour is within a tariff zone registered on your RMV-JobTicket.
- ✓ If you want to use 1st class once or regularly, you can buy a 1st class surcharge – as a single ticket or as a season ticket.
- ✓ If you have forgotten the RMV-JobTicket during a check, showing it later you can reduce the claim for the increased fare to 7 euros.
- ✓ If you lose the RMV-JobTicket, you can get a replacement ticket issued.
- ✓ If your RMV-JobTicket is issued as an eTicket, you benefit, like all annual ticket holders, from attractive car sharing offers and, for example, have discounts when registering and booking.

RMV-JobTicket and data protection

If your RMV-JobTicket is issued on a chip card, the eTicket RheinMain, your personal data (first and last name, gender, date of birth in masked form) has been processed. This is done according to the principle of data economy and takes into account the requirements of the GDPR. The processing takes place in a password-protected area of the RMV provided by the sales system (vHGS). You have the option of having your personal data displayed on a card reader or an RMV ticket machine with eTicket functionality.

You can also obtain information about the validity area of your RMV-JobTicket from your employer or from any RMV ticket machine with eTicket functionality. Alternatively, you can use a smartphone with an NFC interface.

RMV – powerful performance

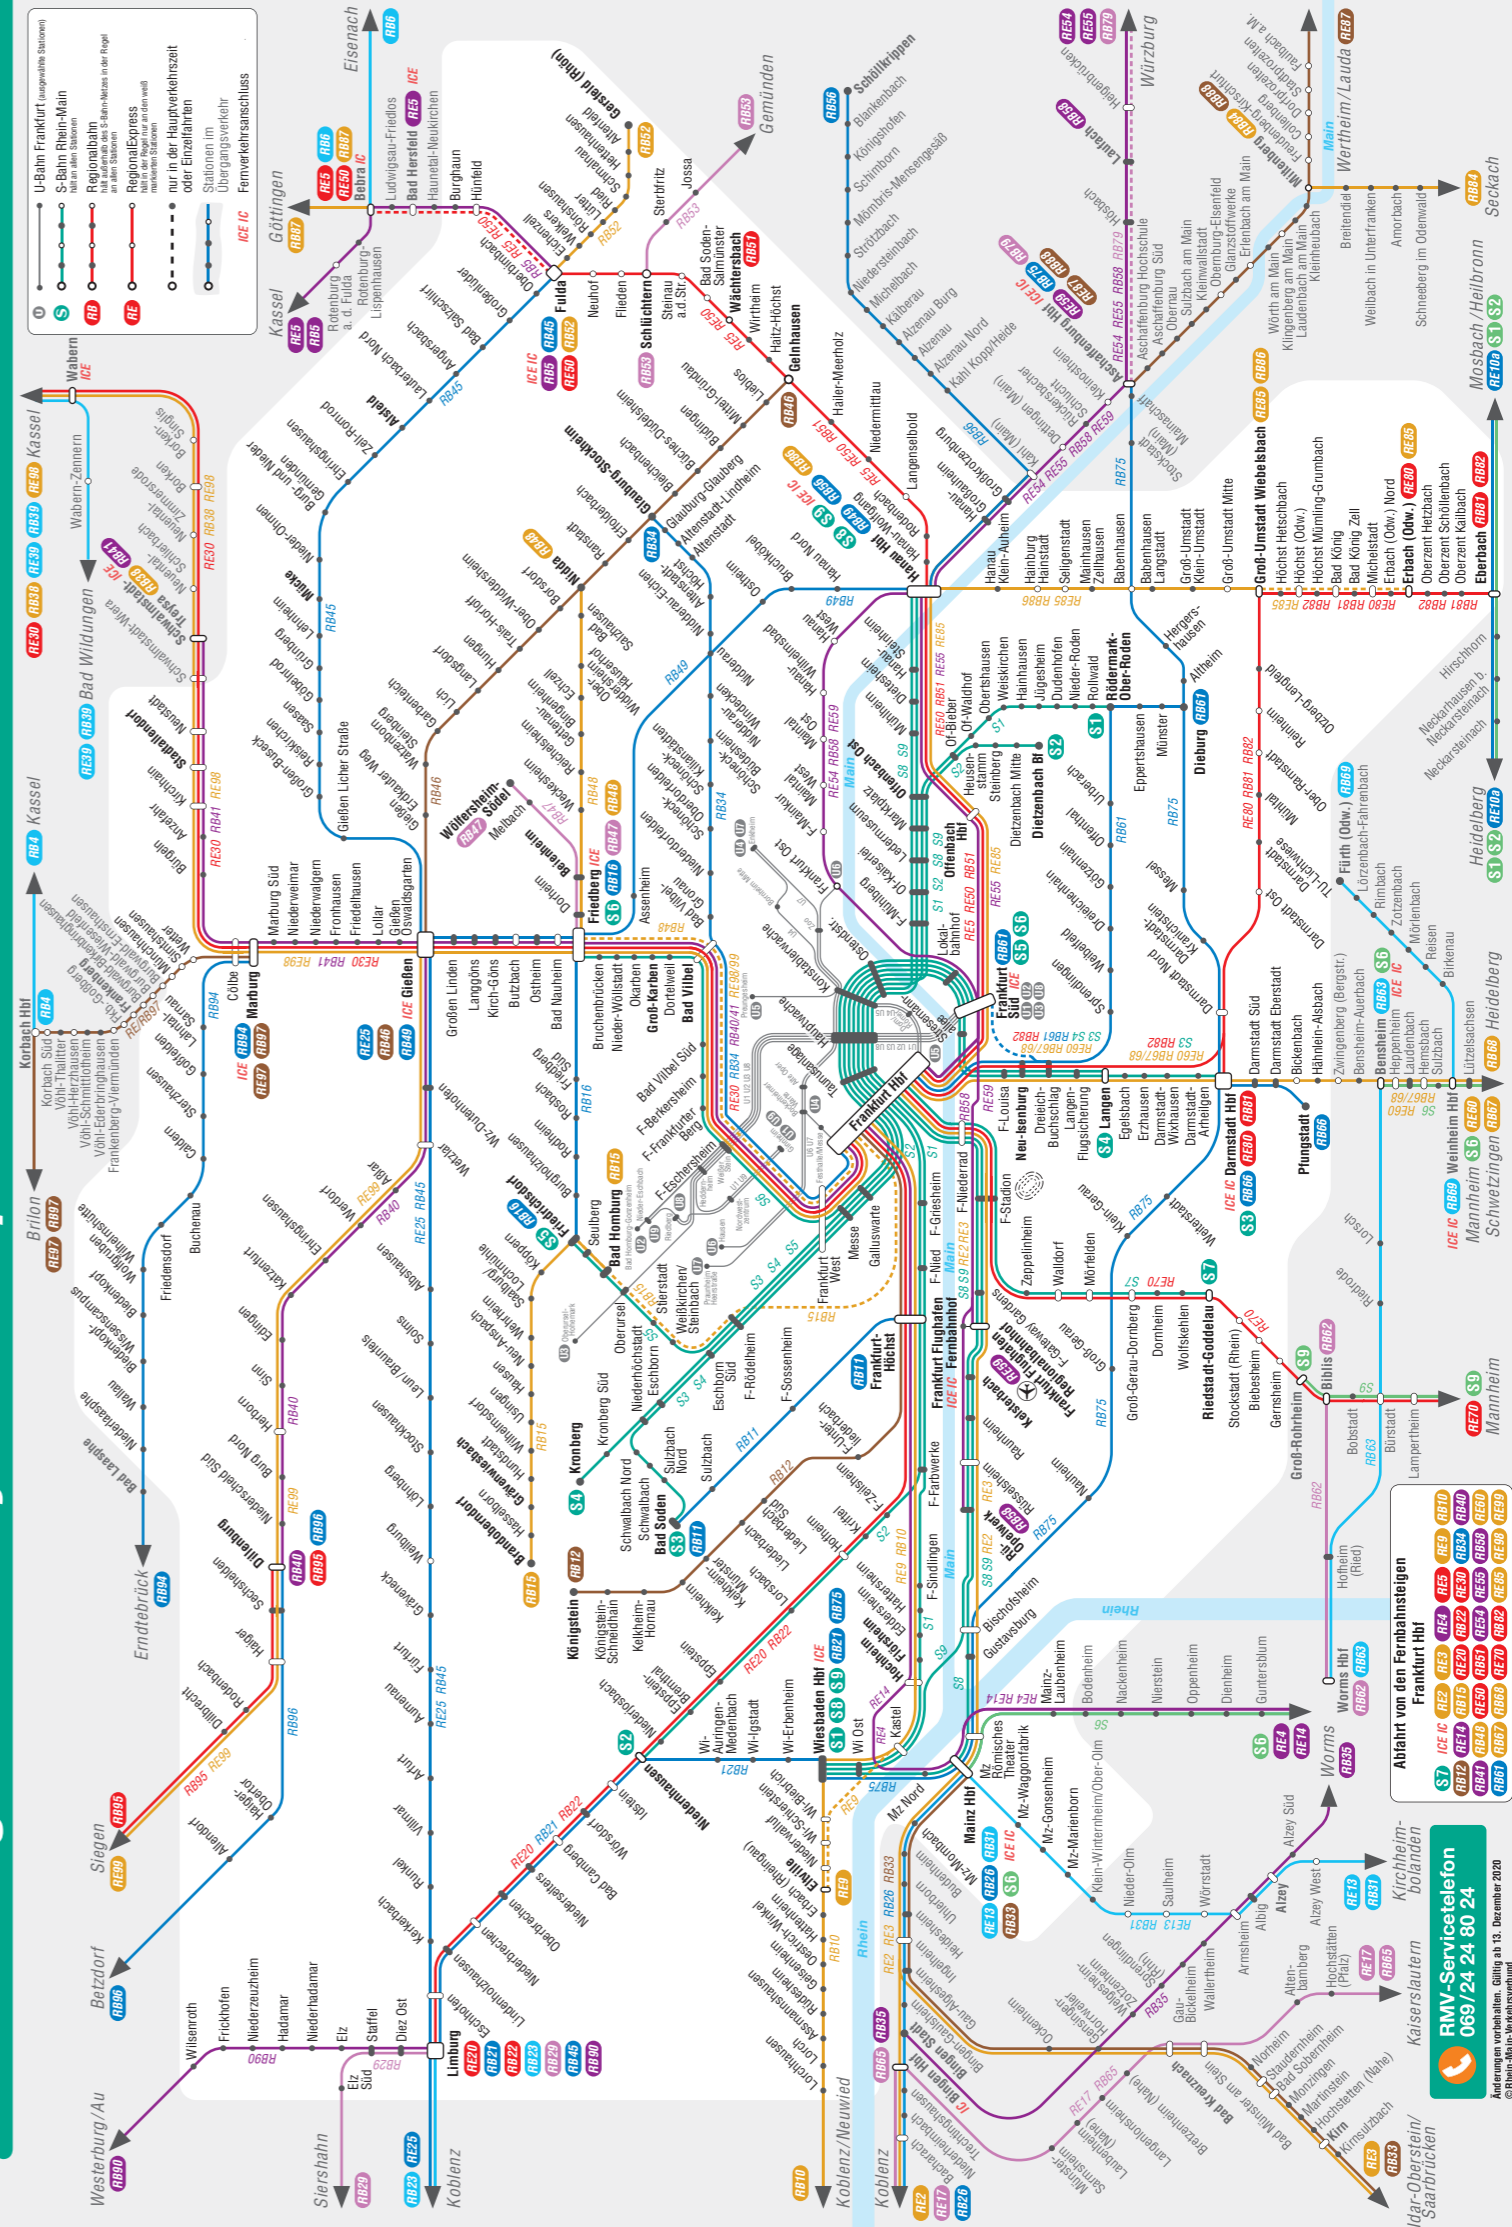

RMV is one of the largest transport associations in Europe. More than 5 million people live in the network area – the greater Rhine-Main area. Over 160 transport companies are deployed for passengers in the transport association.

RMV offers a coordinated range of buses and trains from a single source. An RMV ticket is valid for all local transport in the network, i.e. for regional trains (RE, RB), suburban train, underground train, trams and buses.

For this purpose, the RMV app provides you with suitable connections including line number, travel times and any delays directly on your smartphone.

RMV mobility centres

Your new RMV-JobTicket

When you receive a new RMV-JobTicket from your employer, you can find out where you can travel with your ticket at the RMV mobility centres, via RMV service phone or online on www.rmv.de.

If you still have an RMV annual pass, you can return it to the transport company from whom you bought it, so that you still have the price advantage of the annual ticket and you get it paid out.
